(12) Catalog Description:

This course is designed to understand, practice, and improve upon the five components of fitness: muscular endurance, muscular strength, cardiovascular fitness, flexibility, and body composition. Class objectives will center around the basic principles of physical training: specificity, overload, reversibility and individual differences. Students will learn proper exercise techniques, how to use various types of fitness equipment, and overall safety.

II. COURSE OUTCOMES:

(Specify the learning skills the student demonstrates through completing the course and link critical thinking skills to specific course content and objectives.)

Upon completion of this course, students will be able to:

- I. Analyze and assess their fitness levels based on the five components of fitness: muscular strength, muscular endurance, flexibility, cardiovascular endurance, and body composition through the use of pre- and post-testing with various measuring devices (body fat analyzer, sit and reach, scales, etc.).
- II. Execute isotonic and isometric exercises using weights, resistance bands, balls, powerwands, flex bands, and body weight. These exercises are designed specifically to develop:
- III. Muscular Endurance
- IV. Muscular Strength
- V. Flexibility
- VI. Cardiovascular Endurance
- VII. Body Composition

III. COURSE OBJECTIVES:

(Specify major objectives in terms of the observable knowledge and/or skills to be attained.)

In the process of completing this course, students will:

- I. Execute exercises in the following areas:
- II. Muscular strength
- III. Muscular endurance
- IV. Flexibility
- V. Cardiovascular Endurance
- VI. Demonstrate and participate in exercises for the specified component of fitness
- VII. Use of hand weights and resistance bands for muscular strength.
- VIII. Use of isometric and isotonic exercises using body weight to build muscular endurance.
- IX. Walk, jog, run, and/or aerobics for cardiovascular endurance

- X. Use of flex bands for stretching and strength improvement
- XI. Use balance ball for stability, strengthening exercise and flexibility

IV. COURSE OUTLINE:

Lab Content:

see lecture

V. APPROPRIATE READINGS

Reading assignments may include but are not limited to the following:

I. Sample Text Title:

1. Recommended - McManamas/Schmottlach Physical Education Activity Handbook, Benjamin-Cummings Pub Co, 2005,

II. Other Readings

_ Global or international materials or concepts are appropriately included in this course

X Multicultural materials and concepts are appropriately included in this course

If either line is checked, write a paragraph indicating specifically how global/international and/or multicultural materials and concepts relate to content outline and/or readings.

Fitness levels, body types, and fitness experiences can be diverse and be based on individuality, exercise experience, as well as cultural differences. The instructor can discuss these differences as well as practice some of them. This allows students to be exposed to the different modalities used for fitness based on these differences.

VI. METHODS TO MEASURE STUDENT ACHIEVEMENT AND DETERMINE GRADES:

Students in this course will be graded in at least one of the following four categories. Please check those appropriate. A degree applicable course must have a minimum of one response in category A, B, or C.

A. V	A. Writing		
	Check either 1 or 2 below		
	1. Substantial writing assignments are required. Check the appropriate boxes below and provide a written description in the		
	space provided.		
X	2. Substantial writing assignments are NOT required. If this box is checked leave this section blank. For degree applicable		
	^A courses you must complete category B and/or C.		
	1 3 3		•
	a) essay exam(s)		d) written homework
	• • • • •		
	a) essay exam(s)		d) written homework

Required assignments may include but are not limited to the following:

B. Problem Solving

Computational or non-computational problem-solving demonstrations, including:	
a) exam(s)	d) laboratory reports
b) quizzes	e) field work
c) homework problems	f) other (specify):

Required assignments may include but are not limited to the following:

C. S	C. Skill demonstrations, including:		
Х	a) class performance(s)	Х	c) performance exams(s)
	b) field work		d) other (specify)

Required assignments may include but are not limited to the following:

1. Demonstrate the proper techniques for using various fitness modalities (bands, wands, hand weights).

2. Understand and be able to administer and evaluate various fitness tests.

a. sit-up/Push-up Test

b. body composition

c. sit and reach

d. Target Heart Rate

D. Objective examinations including:				
Х	a) multiple choice		d) completion	
X	b) true/false		e) other (specify):	

COURSE GRADE DETERMINATION:

Description/Explanation: Based on the categories checked in A-D, it is the recommendation of the department that the instructor's grading methods fall within the following departmental guidelines; however, the final method of grading is still at the discretion of the individual instructor. The instructor's syllabus must reflect the criteria by which the student's grade has been determined. (A minimum of five (5) grades must be recorded on the final roster.)

If several methods to measure student achievement are used, indicate here the approximate weight or percentage each has in determining student final grades.

50% Participation 25% Skills/performance tests 25% Written Tests

VII. EDUCATIONAL MATERIALS

For degree applicable courses, the adopted texts, as listed in the college bookstore, or instructor-prepared materials have been certified to contain college-level materials.

Validation Language Level (check where applicable):	College-Leve	
Textbook	YES X	NO
Reference materials	X	
Instructor-prepared materials	Х	
Audio-visual materials	X	
Indicate Method of evaluation:		
Used readability formulae (grade level 10 or higher)		
Text is used in a college-level course X		
Used grading provided by publisher		
Other: (please explain; relate to Skills Levels)		
Computation Level (Eligible for MATH 101 level or higher where applicable)		X
Content		
Breadth of ideas covered clearly meets college-level learning objectives of this course	Х	
Presentation of content and/or exercises/projects:		
Requires a variety of problem-solving strategies including inductive and deductive reasoning.	X	
Requires independent thought and study	X	
Applies transferring knowledge and skills appropriately and efficiently to new situations or	v	
problems.	<u> </u>

BASIC SKILLS ADVISORIES PAGE The skills listed are those needed for eligibility for English 125, 126, and Math 101. These skills are listed as the outcomes from English 252, 262, and Math 250. In the right hand column, list at least <u>three</u> major basic skills needed at the beginning of the target course and check off the corresponding basic skills listed at the left.

(eligibility for English 126)	Student must be able to read the required text.
(as outcomes for English 262)	
	Student must be able to apply word analysis skills to fitness terminology.
X Using phonetic, structural, contextual, and	
dictionary	Student must be able to read the written exams.
skills to attack and understand words.	
Applying word analysis skills to reading in	
context.	
X Using adequate basic functional vocabulary	
skills.	
X Using textbook study skills and outlining skills.	
Using a full range of literal comprehension	
skills and	
basic analytical skills such as predicting,	

inferring, concluding, and evaluating.		
(eligibility for English 125) (as outcomes for English 252) XWriting complete English sentences and avoiding errors most of the time. XUsing the conventions of English writing: capitalization, punctuation, spelling, etc. XUsing verbs correctly in present, past, future, and present perfect tenses, and using the correct forms of Expanding and developing basic sentence structure with Appropriate modification. Combining sentences using coordination, subordination,	Student must be able to complete the exams. Students must be able to recognize basic skills techniques and logically express them on written exams. Student must be able to evaluate muscle location and use appropriate terminology when describing them.	
Check the appropriate spaces. <
