(12) Catalog Description:

This course covers the principles of orthographic drawing, pictorial drawing, dimensioning, tolerancing, and descriptive geometry and their application to the visualization, representation, analysis, solution, and documentation of engineering problems, using freehand sketching, computer-aided drafting (CAD), and solid modeling.

II. COURSE OUTCOMES:

(Specify the learning skills the student demonstrates through completing the course and link critical thinking skills to specific course content and objectives.)

Upon completion of this course, students will be able to:

- A. graphically represent three-dimensional objects using accepted engineering practices.
- B. communicate graphically using computer tools and freehand sketching.
- C. use CAD and solid modeling software in an engineering design project.

III. COURSE OBJECTIVES:

(Specify major objectives in terms of the observable knowledge and/or skills to be attained.)

In the process of completing this course, students will:

- A. use computer-drawing software to geometrically construct two-dimensional shapes.
- B. use computer-drawing software to construct multi-view orthographic projections of three-dimensional objects.
- C. create auxiliary and sectional views of objects.
- D. use proper dimensioning and tolerance techniques to fully define an object.

- E. demonstrate proficiency at freehand technical sketching.
- F. use solid modeling software to represent a three-dimensional object.
- G. design solutions to engineering challenges by use of engineering drawings.
- H. apply the principles of orthographic projection, isometrics, and descriptive geometry to the solution of engineering problems.

IV. COURSE OUTLINE:

Lecture Content:

All of the following content is presented in lecture and practiced by students in computer laboratory exercises.

- A. Introduction to computer-drawing software
- 1. The importance of graphics in the design process
- 2. Starting a computer drawing
- 3. Saving computer files / Sending and receiving files via e-mail
- 4. Basic drawing skills
- a. Drawing Lines
- b. Erasing and trimming lines
- c. Copying lines
- B. Geometric constructions
- 1. Using rectangular and polar coordinates
- 2. Using Arrays
- C. Technical sketching
- 1. Basic sketching skills
- 2. Proportion
- 3. Three-dimensional pictorial sketches
- D. Multi-view orthographic projections
- 1. Projection planes (frontal, horizontal, and profile)
- 2. The six principal views
- 3. View placement
- 4. Multi-view drawings from three-dimensional models
- 5. Visualization
- 6. Multi-view representations of solid object features
- a. Planes (principal, inclined, and oblique)
- b. Curved surfaces
- c. Holes
- d. Fillets and rounds
- E. Auxiliary Views
- 1. Projection theory
- 2. Auxiliary views from front, top, and side views
- 3. Partial auxiliary views
- 4. Secondary auxiliary views
- F. Sectional Views
- 1. Purpose of sectional views
- 2. Cutting plane lines
- 3. Sectional view types
- a. Full sections
- b. Half sections
- c. Broken-out sections
- d. Revolved sections
- e. Removed sections
- f. Offset sections
- G. Dimensioning
- 1. Size dimensions
- 2. Location dimensions
- 3. Hole dimensions
- 4. Dimensioning rules and practices
- H. Tolerance
- 1. General tolerances
- 2. Limit dimensions
- 3. Plus and minus dimensions
- 4. Geometric dimensioning and tolerancing

- I. Three-dimensional Pictorial Drawings
- 1. Isometric pictorials
- 2. Oblique pictorials
- 3. Perspective views
- J. Descriptive Geometry
- 1. Points, lines, and planes
- 2. Using auxiliary views
- 3. Solving design problems with descriptive geometry
- K. Three-Dimensional Solid Models
- 1. Creating three-dimensional solid models
- 2. Wireframe and solid models
- 3. Solving design problems using three-dimensional models
- L. Design Project: Using graphics skills to solve a design challenge

Lab Content:

All of the lecture content is practiced by students in computer laboratory exercises.

V. APPROPRIATE READINGS

Reading assignments may include but are not limited to the following:

A. Sample Text Title:

or

1. Recommended - Earle, J. Engineering Design Graphics, ed. 12 Pearson Prentice Hall, 2009,

or

- 2. Recommended Howard, W. and Musto, J. *Introduction to Solid Modeling, using SolidWorks 2010*, ed. 6 McGraw Hill, 2010,
- 3. Recommended Bertoline, G and Wiebe, E. *Fundamentals of Graphics Communication*, ed. 5 McGraw Hill, 2007,
- 4. Recommended Bethune, James D. Engineering Graphics with AutoCAD 2009, Pearson Prentice Hall, 2009,

B. Other Readings

____ Global or international materials or concepts are appropriately included in this course _____ Multicultural materials and concepts are appropriately included in this course

If either line is checked, write a paragraph indicating specifically how global/international and/or multicultural materials and concepts relate to content outline and/or readings.

VI. METHODS TO MEASURE STUDENT ACHIEVEMENT AND DETERMINE GRADES:

Students in this course will be graded in at least one of the following four categories. Please check those appropriate. A degree applicable course must have a minimum of one response in category A, B, or C.

А.	Writing						
	Check either 1 or 2 below						
	1. Substantial writing assignments are required. Check the appropriate boxes below and provide a written description in the space provided.						
X	2. Substantial writing assignments are NOT required. If this box is checked leave this section blank. For degree applicable courses you must complete category B and/or C.						
	a) essay exam(s) d) written homework						

b) term or other paper(s)	e) reading reports
c) laboratory report(s)	f) other (specify)

Required assignments may include but are not limited to the following:

B. Problem Solving Computational or non-computational problem-solving demonstrations, including:				
X a) exam(s)			d) laboratory reports	
	b) quizzes		e) field work	
	c) homework problems	X	f) other (specify):	

Required assignments may include but are not limited to the following:

1. Determining the missing view of an object in a multi-view projection.

2. Determining the distance between two lines in space.

C. S	C. Skill demonstrations, including:				
Х	a) class performance(s)	Х	c) performance exams(s)		
	b) field work		d) other (specify)		

Required assignments may include but are not limited to the following:

1. Constructing the multi-view drawing of a given object.

2. Constructing an auxiliary view of an object.

D. Objective examinations including:				
a) multiple choice		d) completion		
b) true/false		e) other (specify):		
c) matching items				

COURSE GRADE DETERMINATION:

Description/Explanation: Based on the categories checked in A-D, it is the recommendation of the department that the instructor's grading methods fall within the following departmental guidelines; however, the final method of grading is still at the discretion of the individual instructor. The instructor's syllabus must reflect the criteria by which the student's grade has been determined. (A minimum of five (5) grades must be recorded on the final roster.)

If several methods to measure student achievement are used, indicate here the approximate weight or percentage each has in determining student final grades.

Lab Drawings: 50% Tests: 30% Projects: 20%

VII. EDUCATIONAL MATERIALS

For degree applicable courses, the adopted texts, as listed in the college bookstore, or instructor-prepared materials have been certified to contain college-level materials.

Validation Language Level (check where applicable):		College-Level (YES	Criteria Met NO
Textbook Reference materials		$\frac{X}{X}$	
Instructor-prepared materials Audio-visual materials			X X
Indicate Method of evaluation: Used readability formulae (grade level 10 or higher) Text is used in a college-level course Used grading provided by publisher	<u> </u>		

Other: (please explain; relate to Skills Levels)

Computation Level (Eligible for MATH 101 level or higher where applicable)	X	
Content		
Breadth of ideas covered clearly meets college-level learning objectives of this course	X	
Presentation of content and/or exercises/projects:		
Requires a variety of problem-solving strategies including inductive and deductive reasoning.	X	
Requires independent thought and study	X	
Applies transferring knowledge and skills appropriately and efficiently to new situations or	v	
problems	Λ	

List of Reading/Educational Materials

Recommended - Earle, J. Engineering Design Graphics, ed. 12 Pearson Prentice Hall, 2009,

Recommended - Howard, W. and Musto, J. Introduction to Solid Modeling, using SolidWorks 2010, ed. 6 McGraw Hill, 2010,

Recommended - Bertoline, G and Wiebe, E. Fundamentals of Graphics Communication, ed. 5 McGraw Hill, 2007,

Recommended - Bethune, James D. Engineering Graphics with AutoCAD 2009, Pearson Prentice Hall, 2009,

Fundamentals of Graphics Communication, Bertoline, G and Wiebe, E., McGraw Hill, 2005. Engineering Graphics with AutoCAD

2006, Bethune, James D., Pearson Prentice Hall, 2006. AutoCAD 2006 Tutorial, First Level: 2D Fundamentals, Shih, Randy H., Schroff Development Corporation, 2006. AutoCAD 2006 Tutorial, Second Level: 3D Modeling, Shih, Randy H., Schroff Development Corporation, 2006. Solidworks 2005: The Basics, A Working Knowledge of SolidWorks, Planchard, D. and Planchard, M., Schroff Development Corporation, 2005. Computer Drawing Software (e.g. AutoCAD 2000) Comments:

This course requires special or additional library materials (list attached).

Fundamentals of Graphics Communication, Bertoline, G and Wiebe, E., McGraw Hill, 2005. Engineering Graphics with AutoCAD 2006, Bethune, James D., Pearson Prentice Hall, 2006. AutoCAD 2006

 X
 Tutorial, First Level: 2D Fundamentals, Shih, Randy H., Schroff Development Corporation, 2006.

 AutoCAD 2006 Tutorial, Second Level: 3D Modeling, Shih, Randy H., Schroff Development

 Corporation, 2006. Solidworks 2005: The Basics, A Working Knowledge of SolidWorks, Planchard, D. and Planchard, M., Schroff Development Corporation, 2005. Computer Drawing Software (e.g. AutoCAD 2000)

BASIC SKILLS ADVISORIES PAGE The skills listed are those needed for eligibility for English 125, 126, and Math 101. These skills are listed as the outcomes from English 252, 262, and Math 250. In the right hand column, list at least <u>three</u> major basic skills needed at the beginning of the target course and check off the corresponding basic skills listed at the left.

needea	at the beginning of the target course and cheek	
(eligibility for English 125)		1. Writing descriptions of engineering drawing techniques.
(as out	comes for English 252)	
		2. Writing summaries of engineering design solution to complement
Х	Writing complete English sentences and	engineering drawings.
avoidir	0 1 0	engineering drawings.
avoiun	errors most of the time.	3. Writing interpretations of engineering drawings in order to show
v		
	Using the conventions of English writing:	comprehension of notation and symbols.
capitali		
	punctuation, spelling, etc.	
X	Using verbs correctly in present, past, future,	
and		
	present perfect tenses, and using the correct	
forms of	of	
	common irregular verbs.	
X	Expanding and developing basic sentence	
structu	re with	
	appropriate modification.	
Х	Combining sentences using coordination,	

subordination,				
and phrases.				
X Expressing the writer's ideas in short personal				
papers				
utilizing the writing process in their				
development.				
(eligibility for English 126)	1. Reading CAD software manual and textbook and applying topics to			
	engineering drawings.			
(as outcomes for English 202)	chgnicering drawings.			
X Using phonetic, structural, contextual, and	2. Translating verbal information into mathematical equations or geometric			
	diagrams.			
skills to attack and understand words.				
X Applying word analysis skills to reading in	3. Reading descriptions of engineering design problem and applying			
	information to problem solving method.			
X Using adequate basic functional vocabulary				
skills.				
X Using textbook study skills and outlining				
skills.				
X Using a full range of literal comprehension				
skills and				
basic analytical skills such as predicting,				
inferring,				
concluding, and evaluating.				
Check the appropriate spaces.				
Eligibility for Math 101 is advisory for the target course.				
Eligibility for English 126 is advisory for the target course.				
Eligibility for English 125 is advisory for the target course.				
If the reviewers determine that an advisory or advisories in Basic Skills are all that are necessary for success in the target				
course, stop here, provide the required signatures, and forward this form to the department chair, the appropriate associate dean,				
and the curriculum committee.	nd the curriculum committee.			

CONTENT REVIEW				
MATH 102 PLANE GEOMETRY				
MATH 103 INTERMEDIATE ALGEBRA				
Simplify and/or factor mathematical expressions into forms more conducive to analysis.				
Solve equations introduced in Intermediate Algebra.				
Graph functions and relations introduced in Intermediate Algebra.				
Apply Intermediate Algebra topics to solve real-life problems.				

REQUISITES						
Subject Prerequisite MATH 102 PLANE GEOMETRY						
• Apply deductive reasoning with a geometric context.	• use computer-drawing software to geometrically construct two-dimensional shapes.					
Subject Prerequisite MATH 103 INTERMEDIATE ALGEBRA						
• Simplify and/or factor mathematical expressions into forms more conducive to analysis.	• use computer-drawing software to geometrically construct two-dimensional shapes.					

ESTABLISHING PREREQUISITES OR COREQUISITES

Every prerequisite or corequisite requires content review plus justification of at least one of the seven kinds below. Prerequisite courses in communication and math outside of their disciplines require justification through statistical evidence. Kinds of justification that may establish a prerequisite are listed below.

Check one of the following that apply. Documentation may be attached.

- The prerequisite/corequisite is required by law or government regulations. 1. ____
 - Explain or cite regulation numbers:
- The health or safety of the students in this course requires the prerequisite. 2. _____
- Justification: Indicate how this is so.
- 3. _____ The safety or equipment operation skills learned in the prerequisite course are required for the successful or safe completion of this course.
 - Justification: Indicate how this is so.
- The prerequisite is required in order for the course to be accepted for transfer to the UC or CSU systems. 4. ____ Justification: Indicate how this is so.
- _____Significant statistical evidence indicates that the absence of the prerequisite course is related to unsatisfactory 5. performance
 - in the target course.
 - Justification: Cite the statistical evidence from the research.
- 6. _____ The prerequisite course is part of a sequence of courses within or across a discipline.
 7. __X_ Three CSU/UC campuses require an equivalent prerequisite or corequisite for a course equivalent to the target course:
- Similar courses at CSU, Fresno(ME 26), Cal Poly San Luis Obispo (ME 151), and UC, Davis (ENGR 4)require at least this level of course. Algebra is required for admission into the engineering programs at each school.
