

## PROGRAM OF STUDY

### Equine Technician Certificate of Achievement

This program emphasizes development of the basic skills and competencies required for students seeking entry-level employment in the care and management of the student's livestock species of choice. Emphasis will be placed on animal behavior & handling, safety, feeding, breeding, environmental management, marketing, health maintenance and common veterinary procedures. Students will also receive basic training relevant to farm construction/repair skills and the operation of commonly used farm/ranch equipment. Students who complete this program may gain employment as a production technician, animal trainer, livestock fitter, livestock health & sanitation technician, or meat cutter. Courses may be applied toward the Animal Science Certificate of Achievement and/or the Animal Science Associate of Science Degree.
