Course Hours					
	Weekly Lec hours:	8.00	Degree applicable:		X
	Weekly Lab hours:	9.00	Non-degree applicable:		
	Total Contact hours:	306.00	Basic skills:		
Lec will generate __ hour(s) outside work.			(9) RC Fulfills AS/AA degree requirement: (area)		
Lab will generate __ hour(s) outside work.			General education category:		
			Major: MECHANIZED AGRICULTURE		
			Certificate of: MECHANIZED AGRICULTURE		
			Certificate in:		
(5) Grading Basis:	Grading Scale Only	X	(10) CSU Baccalaureate:		
	Pass/No Pass option		X		
	Pass/No Pass only		(11) Repeatable: (A course may be repeated three times)		
(6) Advisories:			0		
(7) Pre-requisites (requires C grade or better):	<ul style="list-style-type: none"> Eligibility for English 252, English 262, and Mathematics 256 		(12) C-ID:		
Corequisites:	<ul style="list-style-type: none"> 		Proposed Start Date: Spring 2013		

(12) Catalog Description:

This course provides in-depth instruction in diesel engines, service department skills and expectations, and specific instruction on agricultural and construction machines. The design and construction of diesel engines, principles and theories of operation, and disassembly and reassembly of engine components will be covered. Instruction on technical reference materials, parts and service books, computer systems and programs used by the service technician will be covered. Students will also develop skills on the service and operation of various machine and engine systems common to the equipment industry.

II. COURSE OUTCOMES:

(Specify the learning skills the student demonstrates through completing the course and link critical thinking skills to specific course content and objectives.)

Upon completion of this course, students will be able to:

- I. Successfully perform a diesel engine overhaul.
- II. Properly service, maintain and operate construction and agricultural equipment
- III. Enter the work force with the knowledge base, work ethic and employability skills required to become an equipment technician.

III. COURSE OBJECTIVES:

(Specify major objectives in terms of the observable knowledge and/or skills to be attained.)

In the process of completing this course, students will:

- I. Demonstrate proper safety procedures relating to rebuilding diesel engines as well as the tools and equipment used to repair these systems
- II. Demonstrate the proper use of lifting tools
- III. Explain the theory and operation of a four-stroke engine
- IV. Explain compression ratio as it relates to diesel engines
- V. Demonstrate troubleshooting techniques used in industry
- VI. Utilize service literature for maintenance, service and repair practices
- VII. Demonstrate component rebuild of basic diesel engine components
- VIII. Identify engine system components
- IX. Describe the function of engine subsystem components
- X. Analyze and Identify the re-usability of diesel engine components
- XI. Demonstrate proper torquing techniques used on diesel engine repair
- XII. Demonstrate the ability to remove and install cylinder sleeves
- XIII. Demonstrate ability to diagnose and repair common engine starting problems
- XIV. Demonstrate proper safety procedures common to repair facilities

- XV. Demonstrate proper safety as applied in the use of hand tools
- XVI. Demonstrate the ability to use precision measuring tools
- XVII. Exhibit the use of service literature (Service Information Systems) including repair manuals and computerized/ web based resources
- XVIII. Define and describe the goals, objectives and corporate structure related to company operations
- XIX. Demonstrate the use of industry service reports
- XX. Identify company product lines
- XXI. Understand the importance of MSDS sheets
- XXII. Define the role of various safety organizations that pertain to the equipment repair industry
- XXIII. Demonstrate the ability to complete forms, time cards, and other written forms of communication
- XXIV. Demonstrate proper safety procedures related to construction and agricultural machine operation
- XXV. Perform walk around inspection on construction and agricultural equipment
- XXVI. Identify components on various types of construction and agricultural equipment
- XXVII. Demonstrate service procedure on different construction and agricultural equipment types
- XXVIII. Demonstrate proper implement hitching and unhitching on construction and agricultural equipment
- XXIX. Effectively complete lift truck operation training
- XXX. Identify service points on construction and agricultural equipment

IV. COURSE OUTLINE:

Lecture Content:

- A. Introduction to Diesel Engines
 - 1. Safety
 - 2. Tools and equipment
 - 3. Engine oil and diesel fuel
 - 4. Cycle operation/combustion chamber
 - 5. Basic engine components
 - 6. Engine disassembly
- B. Diesel Engine Components and Service
 - 1. Cylinder block
 - 2. Camshaft
 - 3. Crankshaft
 - 4. Piston and rings
 - 5. Cylinder head and valves
- C. Diesel Engine Systems
 - 1. Air intake systems
 - 2. Exhaust systems
 - 3. Cooling systems
 - 4. Lubricating systems
- D. Fuel Injection Systems
 - 1. Governors
 - 2. Emission controls
 - 3. Fuel injection nozzles and holders
 - 4. Lubricating systems
- E. Electrical Systems
 - 1. Electricity and magnetism
 - 2. Electrical systems
 - 3. Batteries
 - 4. Starting systems
 - 5. Charging systems
- F. Troubleshooting Diesel Engines
 - 1. Proper starting procedure
 - 2. Diagnosis
 - 3. Tune-up
- G. Introduction to Machine Specific Instruction
 - 1. Role of equipment technician
 - 2. Technical reference material
 - 3. Machine/shop safety

- H. Machine Operation, Pre-delivery Inspection, Machine Operation, and Preventive Maintenance
 - 1. Track-type tractors
 - 2. Hydraulic excavators
 - 3. Wheel loaders
 - 4. Challenger agriculture tractors
 - 5. Backhoe loaders
 - 6. Forklifts
- I. Review of machine types, service department forms, and technical manuals
- J. Service Department Policies and Procedures
 - 1. Personnel management – time cards, hours worked, salary/benefits
 - 2. Customer relations
 - 3. Work assignments
 - 4. Personal tools
 - 5. In-service training
- K. Service Work Orders
 - 1. Preparation
 - 2. Itemizing parts
 - 3. Recording time spent
 - 4. Communicating with customers
- L. Technical Reference Material
 - 1. Serial numbers and models
 - 2. Operators manuals
 - 3. Service manuals
 - 4. Service fiche/computer
 - 5. Machinery updates
- M. Parts Orders
 - 1. Parts books
 - 2. Parts fiche/computer
 - 3. Procedures and forms
 - 4. Proper nomenclature and numbers
- N. Time Management/Warranty
 - 1. Employee productivity
 - 2. Flat rates
 - 3. Hourly rates
 - 4. Processing warranties
- O. Career Preparation
 - 1. Supervision
 - 2. Time Management and Planning
 - 3. Personnel management
 - 4. Job application and resume update
 - 5. Employer/employee relationship

Lab Content:

Diesel Engines

Lab 1: 3406 B Engine Data

Lab 2: Four Stroke Operation

Lab 3: Crankshaft Seal and Wear Sleeve

Lab 4: Compression Ratio Calculation

Lab 5: Piston Group Orientation

Lab 6: Crankshaft Measurement

Lab 7: Cylinder Block and Liner Measurement

Lab 8: Cylinder Head Measurement

Lab 9: Camshaft Measurement

Lab 10: Pistons, Cam Rod, Rings

Lab 11: Lubrication System Relief Valve

- Lab 12: Engine Parts List (SIS)
- Lab 13: Torque Values and Procedures
- Lab 14: Valve Adjustment
- Lab 15: Engine Starting Procedures
- Lab 16: Dynamometer Procedures

Service Fundamentals

- Lab 1: Caterpillar Engine Series
- Lab 2: Product Line
- Lab 3: Dealer Visitation – Selma
- Lab 4: Service Information Systems (SIS)
- Lab 5: Micrometers
- Lab 6: Dial Indicators
- Lab 7: Fastener Identification / Torque
- Lab 8: Fastener Repair
- Lab 9: Fluid Fittings
- Lab 10: Dealer Visitation – Corcoran
- Lab 11: Technician Tools
- Lab 12: Portfolio

Machine Systems

- Lab 1: Lift Trucks
- Lab 2: Agricultural Tractors
- Lab 3: Backhoes
- Lab 4: Skid Steer Loaders
- Lab 5: Wheel Loaders
- Lab 6: Track-Type Tractors
- Lab 7: Hydraulic Excavators

V. APPROPRIATE READINGS

Reading assignments may include but are not limited to the following:

I. Sample Text Title:

1. Recommended - Dagel, J.F., Brady R.N. *Diesel Engine and Fuel System Repair*, ed. 5th Prentice Hall, 2002,

II. Other Readings

1. Recommended - *Miscellaneous service literature, Caterpillar, Inc. Caterpillar Systems Operation Manuals Machine Manuals, Caterpillar, Inc. Appropriate Engine Service Manuals, Caterpillar, Inc.*

- Global or international materials or concepts are appropriately included in this course
- Multicultural materials and concepts are appropriately included in this course

If either line is checked, write a paragraph indicating specifically how global/international and/or multicultural materials and concepts relate to content outline and/or readings.

VI. METHODS TO MEASURE STUDENT ACHIEVEMENT AND DETERMINE GRADES:

Students in this course will be graded in at least one of the following four categories. Please check those appropriate. A degree applicable course must have a minimum of one response in category A, B, or C.

A. Writing			
Check either 1 or 2 below			
X	1. Substantial writing assignments are required. Check the appropriate boxes below and provide a written description in the space provided.		
	2. Substantial writing assignments are NOT required. If this box is checked leave this section blank. For degree applicable courses you must complete category B and/or C.		
	a) essay exam(s)	X	d) written homework
	b) term or other paper(s)		e) reading reports
X	c) laboratory report(s)		f) other (specify)

Required assignments may include but are not limited to the following:

Completion of CAT Equipment Technician Service Report - See Attached

B. Problem Solving			
Computational or non-computational problem-solving demonstrations, including:			
	a) exam(s)	X	d) laboratory reports
X	b) quizzes	X	e) field work
	c) homework problems		f) other (specify):

Required assignments may include but are not limited to the following:

Problem solving activities to include calculating compression ratios, displacement of cylinders, torque and horsepower, gear ratios, and other computations. In addition students will have to diagnose common starting problems as well as engine failures.

C. Skill demonstrations, including:			
X	a) class performance(s)	X	c) performance exams(s)
X	b) field work		d) other (specify)

Required assignments may include but are not limited to the following:

Skill demonstrations to include laboratory practicals in the area of precision measurement, component identification, and component adjustment and repair.

D. Objective examinations including:			
X	a) multiple choice	X	d) completion
X	b) true/false	X	e) other (specify): drawing schematics, short answer
X	c) matching items		

COURSE GRADE DETERMINATION:

Description/explanation: Based on the categories checked in A-D, it is the recommendation of the department that the instructor's grading methods fall within the following departmental guidelines; however, the final method of grading is still at the discretion of the individual instructor. The instructor's syllabus must reflect the criteria by which the student's grade has been determined. (A minimum of five (5) grades must be recorded on the final roster.)

If several methods to measure student achievement are used, indicate here the approximate weight or percentage each has in determining student final grades.

Exams and Quizzes 25% Assignments 25% Lab Participation 25% Lab Assignments 25%

VII. EDUCATIONAL MATERIALS

For degree applicable courses, the adopted texts, as listed in the college bookstore, or instructor-prepared materials have been certified to contain college-level materials.

Validation Language Level (check where applicable):

- Textbook
- Reference materials
- Instructor-prepared materials
- Audio-visual materials

College-Level Criteria Met	
YES	NO
<u> X </u>	<u> </u>
<u> X </u>	<u> </u>
<u> X </u>	<u> </u>
<u> X </u>	<u> </u>

Indicate Method of evaluation:

- Used readability formulae (grade level 10 or higher)
- Text is used in a college-level course X
- Used grading provided by publisher
- Other: (please explain; relate to Skills Levels)

Computation Level (Eligible for MATH 101 level or higher where applicable) X

Content

- Breadth of ideas covered clearly meets college-level learning objectives of this course X
- Presentation of content and/or exercises/projects:
- Requires a variety of problem-solving strategies including inductive and deductive reasoning. X
- Requires independent thought and study X
- Applies transferring knowledge and skills appropriately and efficiently to new situations or problems. X

List of Reading/Educational Materials

Recommended - Dagel, J.F., Brady R.N. *Diesel Engine and Fuel System Repair*, ed. 5th Prentice Hall, 2002, ISBN: 0130929816

Comments:

- This course requires special or additional library materials (list attached).
- X This course requires special facilities:
- This course has a laboratory component requiring a shop facility.

BASIC SKILLS ADVISORIES PAGE The skills listed are those needed for eligibility for English 125, 126, and Math 201. These skills are listed as the outcomes from English 252, 262, and Math 250. In the right hand column, list at least three major basic skills needed at the beginning of the target course and check off the corresponding basic skills listed at the left.

Check the appropriate spaces.

- Eligibility for Math 201 is advisory for the target course.
 Eligibility for English 126 is advisory for the target course.
 Eligibility for English 125 is advisory for the target course.

If the reviewers determine that an advisory or advisories in Basic Skills are all that are necessary for success in the target course, stop here, provide the required signatures, and forward this form to the department chair, the appropriate associate dean, and the curriculum committee.

REQUISITES

Prerequisite -- ENGL 260 BASIC READING

- | | |
|---|--|
| <ul style="list-style-type: none"> • apply a variety of prereading, reading and postreading strategies that facilitate comprehension of below 8th grade level texts. • interpret visual data and determine its supporting relationship to text. | <ul style="list-style-type: none"> • Utilize service literature for maintenance, service and repair practices • Analyze and Identify the re-usability of diesel engine components • Exhibit the use of service literature (Service Information Systems) including repair manuals and computerized/ web based resources • Demonstrate the use of industry service reports |
|---|--|

ESTABLISHING PREREQUISITES OR COREQUISITES

Every prerequisite or corequisite requires content review plus justification of at least one of the seven kinds below. Prerequisite courses in communication and math outside of their disciplines require justification through statistical evidence. Kinds of justification that may establish a prerequisite are listed below.

Check one of the following that apply. Documentation may be attached.

Significant statistical evidence indicates that the absence of the prerequisite course is related to unsatisfactory performance in the target course.

Justification: Indicate how this is so.

The health or safety of the students in this course requires the prerequisite.

Justification: Indicate how this is so.

The prerequisite course is part of a sequence of courses within or across a discipline.

The prerequisite is required in order for the course to be accepted for transfer to the UC or CSU systems.

Justification: Indicate how this is so.

The prerequisite/corequisite is required by law or government regulations.

Explain or cite regulation numbers:

The safety or equipment operation skills learned in the prerequisite course are required for the successful or safe completion of this course.

Justification: Indicate how this is so.

The safety or equipment operation skills learned in the prerequisite course are required for the successful or safe completion of this course.

Justification: Indicate how this is so.

Three CSU/UC campuses require an equivalent prerequisite or corequisite for a course equivalent to the target course:

Justification: In order for students to be successful as Power Equipment Technicians they need to be able to read and comprehend text. Our industry advisory committee strongly recommends this course as a prerequisite.

Prerequisite -- ENGL 252 Writing Improvement

- | | |
|--|--|
| <ul style="list-style-type: none"> • unified supporting details for each body paragraph which begin with a topic sentence • complete sentences which includes correct capitalization, spelling, use of homophones, etc. • an avoidance of major grammatical errors including verb tense issues, subject-verb agreement, pronoun agreement problems, fragments, fused sentences and comma splices • an evaluation and analysis of ideas at the appropriate course level • Plan and revise with guidance, employing all stages of the writing process when necessary. | <ul style="list-style-type: none"> • Demonstrate the use of industry service reports • Demonstrate the ability to complete forms, time cards, and other written forms of communication |
|--|--|

ESTABLISHING PREREQUISITES OR COREQUISITES

Every prerequisite or corequisite requires content review plus justification of at least one of the seven kinds below. Prerequisite courses in communication and math outside of their disciplines require justification through statistical evidence. Kinds of justification that may establish a prerequisite are listed below.

Check one of the following that apply. Documentation may be attached.

Significant statistical evidence indicates that the absence of the prerequisite course is related to unsatisfactory performance in the target course.

Justification: Indicate how this is so.

The health or safety of the students in this course requires the prerequisite.

Justification: Indicate how this is so.

The prerequisite course is part of a sequence of courses within or across a discipline.

The prerequisite is required in order for the course to be accepted for transfer to the UC or CSU systems.

Justification: Indicate how this is so.

The prerequisite/corequisite is required by law or government regulations.

Explain or cite regulation numbers:

The safety or equipment operation skills learned in the prerequisite course are required for the successful or safe completion of this course.

Justification: Indicate how this is so.

The safety or equipment operation skills learned in the prerequisite course are required for the successful or safe completion of this course.

Justification: Indicate how this is so.

Three CSU/UC campuses require an equivalent prerequisite or corequisite for a course equivalent to the target course:

Justification: In order for students to be successful as Power Equipment Technicians they need to be able to write. Our industry advisory committee strongly recommends this course as a prerequisite.

Prerequisite -- MATH 250 COLLEGE ARITHMETIC

- Apply the four arithmetic operations to fractions.
- Apply the four arithmetic operations to integers.
- Apply the four arithmetic operations to decimals.

- Explain compression ratio as it relates to diesel engines
- Demonstrate the ability to use precision measuring tools

ESTABLISHING PREREQUISITES OR COREQUISITES

Every prerequisite or corequisite requires content review plus justification of at least one of the seven kinds below. Prerequisite courses in communication and math outside of their disciplines require justification through statistical evidence. The safety or equipment operation skills learned in the prerequisite course are required for the successful or safe completion of this course.

Justification: Indicate how this is so.

Three CSU/UC campuses require an equivalent prerequisite or corequisite for a course equivalent to the target course:

Justification: In order for students to be successful as Power Equipment Technicians they need to be able to do basic math. Our industry advisory committee strongly recommends this course as a prerequisite.

JUSTIFICATION OF LIMITATION ON ENROLLMENT

Enrollment in courses or blocks of courses may be limited based on performance, honors, or other performance based criteria. Be mindful of the disproportionate impact the limitation will have on specific groups of students. It is important to determine if the limitation will disproportionately keep under-represented students from enrolling in the course or block of courses.

Describe the reasons for limiting the enrollment.

Course Designator: MAG 20

Course Title(s): EQUIPMENT TECHNICIAN; DIESEL ENGINES, SERVICE FUNDAMENTALS, MACHINE SYSTEMS

Rationale for Limiting Enrollment:

0
