Course Description

This course in concert with Auto11 will prepare the student with the knowledge and skills to perform diagnosis and repair of various automotive components and enter the automotive service industry at the advanced apprentice level. Subjects include: Safety, Ethics, Regulations, Engine Repair, Manual Transmissions, Clutches, Automatic Transmissions, and Electrical Systems. Tools and equipment are provided; however the student is expected to furnish a Digital Volt Ohm Meter (DVOM), personal safety items, and uniform shirts.

Course Outcomes

Upon completion of this course, students will be able to:

- Diagnose, repair, and service automobiles and light trucks utilizing the logic and reasoning developed in class through hands-on experience.
- Apply safety procedures in a shop environment and follow hazardous waste handling procedures.
- Apply and demonstrate shop procedures from hands-on experience
- Perform electrical system repairs and service in accordance with accepted industry practices.

Course Objectives

In the process of completing this course, students will:

- Learn to work safely in a shop environment
- Manage hazardous waste materials
- Develop an understanding of the Automotive Industry
- Identify and use tools and shop equipment
- Identify and use automotive measuring devices
- Analyze and identify electrical systems
- Diagnose and repair electrical systems
