| Office: FEM 1E | Office Hours: WTh 10-11; F 8-9 by E-Mail |
| Class meets: M-Th, 1/9-5/11, 8:00-8:50, RM: CCI 200 | |
| Text: Elementary Statistics: Picturing the World, 6 th Edition by Larson & Farber | |
| Prerequisite: Math 103. | Basic Skills Advisories: Eligibility for English 126. |

Description

Math 11 is an introduction to statistical methods and techniques for business, behavioral, and social science majors. Topics include descriptive measures of central tendency and variability, probability, binomial and normal distributions, random variables, sampling, estimating, hypothesis testing (parametric and nonparametric), correlation and regression.

Expectations / Responsibilities

Instructor

- Motivate and inspire student success.
- Provide a classroom climate in which the student takes responsibility for learning.
- Provide instruction and model the quality of work to be successful in Math 11.
- Clearly communicate progress being made in a timely fashion.

Student

- Follow the class rule – **Be Nice**.
- Be in each class on time with *full participation* from *start to finish*.
- Check Canvas and Study Math daily.
- Learn the material that is taught and *seek additional assistance* when necessary.
- Promptly communicate any class related issues.
- If you miss any class time it may be counted as an absence.

You may be dropped if:

- You have at least one absence by the end of the 3rd week.
- You have 3 or more absences at Noon on March 9, 2017.
- You do not have PAID access to MyLab by NOON on January 26, 2017.
- Your homework average is below 90% at NOON on March 9, 2017.
- Your test average is below 60% at NOON on March 9, 2017.

| Grading | A 90-100% | B 80-89% | C 70-79% | D 60-69% |
|---------------------|---|-----------------|-----------------|-----------------|
| Tests 75% | Tests will be face to face and online. Tests are not equally weighted. NO TEST RETAKES. | | | |
| Homework 15% | Homework assignments may include assignments on MyLab, typed papers, and hand-written solutions to exercises. | | | |
| Quizzes 5% | Quizzes will be on MyLab. | | | |
| Notes 5% | Hand-written notes will be collected for credit. | | | |

Important Dates

| | | |
|--------------|-----|---|
| JAN 27, 2017 | FRI | CENSUS - Last day to ADD/DROP a full-term class |
| MAR 10, 2017 | FRI | DROP DEADLINE - Last day to drop a full-term class to avoid a grade |
| MAY 17, 2017 | WED | Final Exam 8:00-9:50 CCI 200 |

TESTING PROCEDURE

- 1) TEST INSTRUCTIONS will be provided IN-CLASS and/or by ANNOUNCEMENT prior to testing.
- 2) BE PROMPT and well-prepared to take the test.
- 3) Follow all in-class instructions.
- 4) NO PHONES allowed.
- 5) Tests must be completed in a single sitting before leaving the room.
- 6) The SCCC CD policy regarding ACADEMIC DISHONESTY will be applied when appropriate.

ACADEMIC DISHONESTY

Cheating is the act or attempted act of taking an examination or performing an assigned, evaluated task in a fraudulent or deceptive manner, such as having improper access to answers, in an attempt to gain an unearned academic advantage. Cheating may include, but is not limited to, copying from another's work, supplying one's work to another, giving or receiving copies of examinations without an instructor's permission, using or displaying notes or devices inappropriate to the conditions of the examination, allowing someone other than the officially enrolled student to represent the student, or failing to disclose research results completely.

Plagiarism is a specific form of cheating: the use of another's words or ideas without identifying them as such or giving credit to the source. Plagiarism may include, but is not limited to, failing to provide complete citations and references for all work that draws on the ideas, words, or work of others, failing to identify the contributors to work done in collaboration, submitting duplicate work to be evaluated in different courses without the knowledge and consent of the instructors involved, or failing to observe computer security systems and software copyrights. Incidents of cheating and plagiarism may result in any of a variety of sanctions and penalties, which may range from a failing grade on the particular examination, paper, project, or assignment in question to a failing grade in the course, at the discretion of the instructor and depending on the severity and frequency of the incidents.

***NOTE:** If you have a verified need for an academic accommodation or materials in alternate media (i.e., Braille, large print, electronic text, etc.) per the Americans with Disabilities Act or section 504 of the Rehabilitation act please contact me as soon as possible.*

Please refer to SCCC CD policies for guidance on all matters relating to this course.

Objectives

In the process of completing the course, the student will:

- A. Summarize and describe given data sets
- B. Apply the methods of descriptive statistics to determine the measures of central tendency and variability to a variety of problems.
- C. Apply basic principles of probability to determine probabilities of a variety of events.
- D. Analyze discrete and continuous probability distributions.
- E. Explore the basics of sampling theory.
- F. Estimate population parameters through studying confidence intervals.
- G. Examine hypothesis testing for small and large samples and multiple populations.
- H. Determine if a relationship exists between quantitative variables.

Course Outline

- A. Introduction to Statistics
 - 1. Statistical data
 - 2. Frequency distributions
 - 3. Graphs
- B. Population Parameters and Sample Statistics
 - 1. Measures of central tendency.
 - a. Mean
 - b. Median
 - c. Mode
 - 2. Measures of Variability
 - a. Standard deviation
 - b. Quartiles
 - c. Range
- C. Probability
 - 1. Rules of probability, random variables, and expected value.
 - 2. Discrete and continuous probability distributions.
 - a. Binomial Distribution
 - b. Hypergeometric Distribution
 - c. Poisson Distribution
- D. Sampling Theory
 - 1. Simple random sample
 - 2. Central Limit Theorem
- E. Estimating Population Parameters
 - 1. Estimating from a small or large sample.
 - 2. Sample size.
- F. Hypothesis Testing (Parametric/Nonparametric)
 - 1. One population, one and two sided tests.
 - z -test for means and proportions.
 - t -test for means (independent and dependent samples)
 - 2. Two populations, sampling distributions
 - 3. Chi-squared (Goodness of Fit and Contingency Tables)
 - 4. Analysis of Variance (ANOVA)
- G. Correlation and Simple Linear Regression
 - 1. Correlation coefficient
 - 2. Regression coefficient
 - 3. Test of hypothesis about the value of correlation/regression coefficient.
