Structure and Concepts in Mathematics I

REEDLEY COLLEGE

Spring 2019

Meeting Room: SOC 31

Office Hours: M-Th 9:00-9:50

Welcome to Structure and Concepts in Mathematics I

I look forward to spending the semester with you. Over the semester, you will experience a range of feelings, including: success and failure; challenge and boredom; accomplishment and frustration. Please know that I and your fellow students will be here to help you through it. Having persistence, working hard, putting in time and effort will help you succeed.

As your instructor, I will do what I can to give you the resources and support to help you succeed. Please reach out to me if I can help you.

There are many excellent resources available to you on our campus. Other students in class are a good resource and I would encourage you to form small groups to study and do homework together. If you have an unanswered question, come by my office (FEM 1M) which is in the FEM building located in the Math Center. I am available Monday-Thursday from 9:00-9:50.

Other available resources are:

- The Math Center in the FEM building, room 1. Hours: M-Th 8:00 AM - 4:00 PM and F 8:30 AM - 12:00 PM. (559) 638-0300 ext. 3158

What is the STEM Math Study Center?

The STEM Math Study Center is a free tutoring resource available to all Reedley College math students. The services available in the MSC are focused on increasing our students' ability to understand and enjoy mathematics. We hope to bridge the gap that keeps our students from pursuing majors and careers in math-related fields. The MSC has a study area in which students can receive services or study alone. In addition to its study area, the MSC contains the offices of most of our mathematics instructors.

What services are available in the STEM Math Study Center?

The MSC offers drop-in tutoring facilitated by our math faculty and well-qualified student tutors. The MSC has 20 computers and online access available to students with online math homework. The MSC offers workshops on specific math topics throughout the semester to enhance and augment the math education offered to students. The MSC offers bilingual tutoring to Spanish speaking students.

How can I use the STEM Math Study Center?

To use the MSC, students must enroll in INTDS 300, a non-credit course. Enrollment forms are available in the center. Once enrolled in the class, students need only to log-in to the MSC computer when they arrive and log-out when they leave.

- Tutorial Learning service located in the library, LRC room 111. Their hours are M-Th 8:00 AM-5:00 PM and F 8:00 AM - 3:00 PM. Phone (559) 638-0358.
- YouTube also has many good videos for help.

[Video for the Academic Support Centers](#)

Course Description: This course is designed for prospective elementary school teachers. It will study problem solving strategies and skills, number sequences, set theory, ancient numeration systems, number theory, rational and irrational numbers, computation algorithms, and applications of mathematics. Emphasis is on comprehension and analysis of mathematical concepts and applications of logical reasoning. **PREREQUISITES:** Mathematics 103. **ADVISORIES:** Eligibility for English 125 and 126. (A, CSU-GE, UC)

Basic Skills Advisories: Eligible for English 1A

Subject Prerequisites: Math 103 or appropriate AB 705 placement

TEXT (Optional): Sybilla Beckman, Mathematics for Elementary Teachers with Activities, Pearson, 5th Edition, 2018.

Required to have MyMathLab

Notes: Notes for this class are available on Canvas and are **required**. You will need to print and bring them with you each day to class.

StarFish

This class will participate in Starfish Early Alert, which promotes student success through coordination and communication among students, instructors, counselors, and campus support service departments. If I observe that you are experiencing difficulties in the course (attendance concerns, missing assignments, at risk of failing, etc.), I may send an email to your sccd.edu email account through the Starfish Early Alert system. My message will tell you about my concerns and ask you to contact me regarding the concern and what can strategies may help you be successful in the course. A counselor or special program may also follow-up with you regarding the concern. In addition, if I observe that you are doing well in my course, you may also receive “kudos” from me acknowledging your efforts. Starfish Early Alert provides notices by email and/or text. Please check your sccd.edu account frequently.

ATTENDANCE: Everyone can learn math, but don't do it alone! Come to class! In class we will be working on developing your understanding of key concepts and we'll be doing a lot of problem solving. Participating in class activities will help prepare you for exams and is truly an integral part of your learning process. Complications can arise during the semester that can impede making it to class on time or even attending, whether that is due to a traffic delay, a child being ill, or missing your ride. If you miss class, before you do anything else contact me by email. You can watch the video of the class and keep up with your notes if I am able to get them ready in time. If you have trouble with anything in the notes or video, get help in the Math center, tutorial and learning services center, my office, or a friend. It is important that you know the absence policy. If you miss three classes you may be dropped. You are expected to attend all class meetings, be on time, and be in class the entire class session. Calling me to tell me you will be absent **does not** excuse you. If you decide to drop the course, it is **your** responsibility to make the drop official in the Administrations and Records office or else possibly receive a grade of **F**.

Behavioral Standards: Your classmates and I would greatly appreciate that you take care of any personal needs (i.e., using the restroom, getting a drink, sharpening a pencil) before class begins. Please turn your phone off, put it out of sight, and remove any earbuds when you come into class. You may **not** use your phone as a calculator. I would appreciate that you not bring guests to class.

NOTE: The drop deadline is March 15.

HOMEWORK: **NO LATE HOMEWORK WILL BE ACCEPTED!** When a student has not satisfactorily completed 3 homework assignments they will be dropped. Any assignment that is not done on time will receive a grade of 0%.

TESTS: There are no makeup exams for missed tests.

GRADING:

- *Homework:* All of your homework scores will be worth the same percentage. Homework worth 10 points and homework worth 15 points will count the same. Each discussion on the discussion board will count as two homework scores. Homework percentages will be averaged to obtain a chapter homework grade. The homework will be worth 35% of the overall grade.
- *In Class Tests:* All of your in-class test percentages will be averaged. In-class tests are worth 65% of the overall grade.

Example: If your homework grade 75% and your in-class test grade is 80%, then you would compute your grade as follows:

$$(75 \times 0.35) + (80 \times 0.65) = 78.25\%$$

This would give you a grade of “C.”

<u>Percent of Total Points</u>	<u>Grade</u>
90-100	A
80-89	B
68-79	C
55-67	D
0-54	F

WHERE TO FIND YOUR GRADE:

- Canvas - Grades.

SPECIAL NEEDS REQUESTS: If you have a verified need for an academic accommodation or materials in alternate media (i.e., Braille, large print, electronic text, etc.) per the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act, you are encouraged to provide me with your notification of authorized services form from DSP&S and consult with me immediately so that arrangements can be made.

Academic Integrity

You are expected to be honest. In this course, that primarily means you should never submit work that is not your own. This does not mean that you are not allowed to work with other students. I encourage you to collaborate on homework problems! It is often more fruitful and enjoyable to work with other people when trying to figure something out. They can give you a fresh insight or different perspective on the problem. Conversely, explaining your idea to another person forces you to clarify your thoughts and can help to highlight flaws you may have previously overlooked. However, if you work with others to come up with a solution, afterward you should write up your work on your own. You should not base your homework on another’s student’s homework, and never put your name on something you do not understand.

Below is the official School policy on academic dishonesty, cheating and plagiarism.

Academic Dishonesty

Students at Reedley College are entitled to the best education that the college can make available to them, and they, their instructors, and their fellow students share the responsibility to ensure that this education is honestly attained. Because cheating, plagiarism, and collusion in dishonest activities erode the integrity of the college, each student is expected to exert an entirely honest effort in all academic endeavors.

Academic dishonesty in any form is a very serious offense and will incur serious consequences.

Cheating is the act or attempted act of taking an examination or performing an assigned, evaluated task in a fraudulent or deceptive manner, such as having improper access to answers, in an attempt to gain an unearned academic advantage. Cheating may include, but is not limited to, copying from another's work, supplying one's work to another, giving or receiving copies of examinations without an instructor's permission, using or displaying notes or devices inappropriate to the conditions of the examination, allowing someone other than the officially enrolled student to represent the student, or failing to disclose research results completely.

Plagiarism is a specific form of cheating: the use of another's words or ideas without identifying them as such or giving credit to the source. Plagiarism may include, but is not limited to, failing to provide complete citations and references for all work that draws on the ideas, words, or work of others, failing to identify the contributors to work done in collaboration, submitting duplicate work to be evaluated in different courses without the knowledge and consent of the instructors involved, or failing to observe computer security systems and software copyrights.

Incidents of cheating and plagiarism may result in any of a variety of sanctions and penalties, which may range from a failing grade on a particular examination, paper, project, or assignment in question to a failing grade in the course, at the discretion of the instructor and depending on the severity and frequency of the incidents.

Course Objectives

1. Analyze least common multiples and greatest common divisors and their role in standard algorithms;
2. Analyze the structure and properties of whole, rational, and real number systems; define the concept of rational and irrational numbers, including their decimal representation; and illustrate the use of a number line representation;
3. Apply algorithms from number theory to determine divisibility in a variety of settings;
4. Develop activities implementing curriculum standards.
5. Develop and reinforce conceptual understanding of mathematical topics through the use of patterns, problem solving, communication, connections, modeling, reasoning, and representation; and
6. Evaluate the equivalence of numeric algorithms and explain the advantages and disadvantages of equivalent algorithms in different circumstances;
7. Explain the concept of rational numbers, using both ratio and decimal representations; analyze the arithmetic algorithms for these two representations; and justify their equivalence;
8. Perform calculations with place value systems;

COURSE CONTENT OUTLINE:

1. Numeration systems
 1. History
 2. Hindu-Arabic numeration system
 3. Place value systems
2. Integers
 1. Structure and basic properties
 2. Computational algorithms
3. Basic number theory
 1. Divisibility
 2. Prime and composite numbers
 3. Prime factorization
 4. Fundamental theorem of arithmetic
 5. Least common multiple and greatest common divisor
4. Rational numbers
 1. Structure and properties
 2. Ratio and proportion
5. Real numbers
 1. Structure and basic properties
 2. Arithmetic operations
 3. Rational and irrational numbers
 4. Decimal representation
 5. Number line representation
6. Patterns, problem solving, communication, connections, modeling, reasoning, and representation; and
7. National and state curriculum standards for elementary school math including Common Core State Standards.

Important Dates

January 14, Monday	Class begins
January 21, Monday	Martin Luther King Day
February 1, Friday	Last day to drop and avoid a “W”
February 15, Friday	Lincoln’s Birthday
February 18, Monday	Washington’s Birthday
March 15, Friday	Last day to drop and not receive a grade
April 15-19, Monday-Friday	Easter break
May 22, Wednesday	Class Final is 10:00-11:50

The final is a test. Be sure you plan to be there!

How to Send an Email to Mr. Gilmore

Read the syllabus. Often, the question you would like to ask has already been answered in the material I have provided for you.

Use your Reedley College email through Canvas. I am deluged with emails every day, and by using your school account, you'll have a better chance of avoiding the spam filter. Last semester I received about 800 emails from students.

Your Subject line should be the class name and time of the class only.

- Example: Math 103 8:00 AM

This information helps me organize and prioritize student emails. The section information is especially important since I often teach multiple sections of the same course.

Always use a greeting. Do not begin with "Hey" or similar colloquialisms. You should use "Dear Mr. Gilmore:"

Briefly and politely state the reason you are emailing. Offer only as much information as is relevant to the situation. Get to the point right away.

- Name the assignment or projects you are referring to instead of using pronouns or phrases, such as "this assignment".
- Example: Homework problem number 7 in section 7.1.

If you are emailing with a problem, suggest a solution. Be considerate, however, of how your solution might create additional work for me.

Sign it with your name and your student ID number (but never your Social Security number). Use your first and last name, even if you know that I know you.

Your email should be professional. It is important to use punctuation, capitalization, and complete sentences in all email correspondence to me.

Read it over. If you do not have spell-check on your email, then you can copy the message, paste it into a word-processing program, and run spell-check there. Consider not only the mechanics, but also what you have said. Strive for a polite tone, concise language, and clear purpose.

- **Allow adequate time for a reply.** Follow up if more than a few days have passed and you have not gotten a response, then it is appropriate to politely ask if I received your email and had time to consider what you wrote.

If you are simply sending me information then I may not consider a reply necessary. In this case, you are done.

Example: "I have the flu and will not be in class on Tuesday, but Sue will turn my paper in for me."

If your issue is not resolved then consider an office visit.

Often the tone in emails cannot be properly judged. Rather than becoming upset, a visit in person can often remedy the situation.

Subject:	Math 103 8:00

Tahoma	10	B	I	U									
--------	----	----------	----------	----------	--	--	--	--	--	--	--	--	--

Dear Mr. Gilmore:

I will not be in class on Tuesday because I am not feeling well tonight. I will ask John [Smoltz](#) to take notes for me. I will also watch the video that is located in Blackboard and then do the assigned homework in [CourseCompass](#).
