COURSE DESCRIPTION

MFGT 61 – Intermediate Welding
Units: 4
Prerequisites: MFGT 11 or MFGT 60
ADVISORIES: English 132 and Mathematics 103

Continuation of welding techniques learned in MFGT 11 or MFGT 60. Emphasis will focus on shielded metal arc welding (SMAW), gas metal arc welding (GMAW), fluxcored arc welding (FCAW) and gas tungsten arc welding (GTAW/TIG). Welding techniques will be taught in horizontal, vertical and overhead positions on steel, stainless steel, and aluminum. There will also be further hands-on use of oxyfuel cutting (OFC), plasma cutting and carbon air arc gouging.

COURSE OBJECTIVES

1. Demonstrate safe procedures for using hand and power tools
2. Understand the benefits of each welding process used.
3. Identify the proper electrodes, fillers, and equipment for each process and metal type used.
4. List the parts of the SMAW, GMAW, GTAW, and FCAW welding machines.
5. Employ repair procedures using plasma and carbon air arc processes.

EXPECTED STUDENT LEARNING OUTCOMES

1. Properly set up and perform fusion welds with SMAW, GMAW, GTAW, and FCAW in the flat, horizontal, vertical and overhead positions.
2. Apply knowledge of setup and practice procedures for welding of aluminum and stainless steel with GMAW and GTAW processes.
3. Demonstrate competency of cutting procedures for the oxyfuel, plasma and carbon air arc processes.

Student Learning Outcomes are statements about what the discipline faculty hope you will be able to do at the end of the course. This is NOT a guarantee: the ultimate responsibility for whether you will be able to do these things lies with you, the student. In addition, the assessment of Student Learning Outcomes is done by the department in order to evaluate the program as a whole, and not to evaluate individual faculty performance.

ATTENDANCE & DAILY PARTICIPATION (It affects your grade)

Participation is very important. You must be in class in order to participate and complete all work. If you miss a class, you need to make up the time. This may be done any time during open lab, day or evening, regardless of the instructor. (It is necessary to get permission from the instructor who is teaching the class in session.)

Your participation grade will be lowered as absences increase, regardless of total points.

Point deductions as follows

Absence = -15 pts.

Tardy = -5 pts. For each - Morning and break and lunch

- There are no excused absences
- If you miss more than 3 classes in first half of the class (4.5 weeks), you may be dropped.
- Excess of a total of 4 absences anytime during class will result in failing the class.
- Roll will be taken verbally and by use of the time clock.
- To receive daily credit, you must punch in during the 15 minute time period prior to class starting and after class releases.
- You are required to find out from the instructor any material missed during absence.
- Test may be made up at the instructor's discretion.
