

MATH 4A: TRIGONOMETRY
SPRING 2021

Instructor Information

- Mrs. Kelsey Casteel
- When you need to get in contact with me, please message me through the Canvas messaging system. When you are in Canvas click on the “inbox” tab on the main left hand side menu. If Canvas is down (fingers crossed that never happens), then please email me @ kelsey.casteel@reedleycollege.edu
- Office hours are via Canvas messenger or Zoom. If you would like to schedule a zoom session with me, please send me a message through Canvas and we will schedule it and I will send you the meeting information.

Course Information

Welcome to Math 4A, Trigonometry! Our course section number is 55053. This is a 100% online class, which means you will NEVER be required to come to campus. There are also NO required zoom meetings. You need to be determined to stay on top of deadlines and make time in your schedule for this class. You can work ahead as much as you like. This class begins Monday January 11th and ends Friday May 21st. THIS COURSE DOES NOT REQUIRE THE PURCHASE OF ANY TEXTBOOK OR TECHNOLOGY – you are welcome 😊

Course Description

The study of trigonometric functions, their inverses and their graphs, identities and proofs related to trigonometric expressions, trigonometric equations, solving right triangles, solving triangles using the Law of Cosines and the Law of Sines, polar coordinates, and introduction to vectors.

- Advisories: Eligibility for English 1A
- Prerequisite(s): Mathematics 103 or equivalent
- Credits: 4

Course Materials

- The majority of assignments and exams are through an online platform called MyOpenMath, which is completely FREE to you! You won't need to make an account or sign up for anything – you have access through Canvas.
- Scientific Calculator - there are several hand held models that are great, but I recommend using the Desmos scientific/graphing calculator (completely FREE!). Here is a link to the scientific calculator: <https://www.desmos.com/scientific> , and here is a link to the graphing calculator: <https://www.desmos.com/calculator> . If you have a smartphone, you can also download the desmos app for free. If you want to check on a handheld model, please send me a message.

- The textbook used for this course is a completely FREE textbook by OpenStax called *Algebra and Trigonometry*. Click on this link for more information about the textbook: <https://openstax.org/details/books/algebra-and-trigonometry>. You do NOT need to buy a hard copy of the textbook. We will be utilizing chapters 7, 8, 9, and 10.

Student Learning Outcomes

Upon completion of this course, students will be able to:

- Provide and analyze graphs of trigonometric functions.
- Apply trigonometric techniques to solve problems in real world contexts.
- Derive, use and prove trigonometric properties and identities.
- Produce solutions to equations using skills developed in trigonometry.

Course Objectives

In the process of completing this course, students will:

- Identify special triangles and their related angle and side measures;
- Evaluate the trigonometric function of an angle in degree and radian measure;
- Manipulate and simplify a trigonometric expression;
- Solve trigonometric equations, triangles, and applications;
- Graph the basic trigonometric functions and apply changes in period, phase and amplitude to generate new graphs;
- Evaluate and graph inverse trigonometric functions;
- Prove trigonometric identities;
- Convert between polar and rectangular coordinates and equations;
- Graph polar equations;
- Calculate powers and roots of complex numbers using DeMoivre's Theorem; and
- Represent a vector (a quantity with magnitude and direction) in the form $a_i + b_j$.

Grading

You can see your individual assignment grades and overall class grade anytime in Canvas. Your overall class percentage is broken down as follows:

- Exams (including mandatory cumulative final exam): 50%
- Assignments: 30%
- Quizzes: 10%
- Discussions: 10%

How does this actually work? Say that at the end of the class you have the following percentages in each category: 82% in exams, 70% in assignments, 85% in quizzes, and 90% in discussions. Your overall class percentage is calculated as follows:

$$.50*82 + .30*70 + .10*85 + .10*90 = 79.5\%$$

Letter grades given according to the following intervals:

89.5 - 100% A

79.5 - 89.4% B

69.5 - 79.4% C

59.5 - 69.4% D

0 - 59.4% F

Assignments/Quizzes/Discussions

Assignments and quizzes are set up through MyOpenMath with direct access through Canvas (you will NOT need to set up any sort of account outside of Canvas). In assignments, you will have unlimited time on each question and can reset the problem as many times as you need. The quizzes are timed with only one attempt per question. You can retake the quizzes as many times as you like and your best score will be saved.

Discussions are posted using the discussion feature in Canvas. You will see all assignments, quizzes, and discussions organized in the modules.

Any assignment, quiz, or discussion completed after the due date will earn 70% of the credit. As an example, if a discussion is worth 10 points and you respond late, you can only earn up to 7 points. To work on a section assignment late, you will need to click on “use latepass”. You should be able to access a late assignment using a late pass as many times as you need to. Be sure you know if you are just reviewing an assignment or using a late pass to improve your score.

Extra Credit

There are no extra credit opportunities available for this class.

Exams

There are four chapter exams as well as a practice exam. The practice exams can be taken as many times as you like and are optional, they do NOT impact your grade. Be sure you are ready to open the actual exam and complete it in one sitting as you only have one attempt. You can take ONE exam late and must be completed within 48 hours of the original due date. You need to message me if taking a late exam so that I can open it for you. **If you have testing accommodations through the DSP&S office, please talk with me as soon as possible.

Final Exam

There will be a **mandatory** cumulative final exam at the end of the class. It will contain questions from throughout the semester.

Technology

As a student of SCCCD, you are given a free student email account. Make sure you are able to login to this account and check it on a regular basis (at least once a day). You can also set it up through your smart phone if you have one and set up email alerts so that you never miss anything important. Your student email is the

official way your instructors communicate with you outside of class. In addition to your email account, you also have a Canvas account set up by the college. Everything for our course will be available in the Canvas shell.

Access to reliable internet is **mandatory** for success in this class. If you do not have access to the internet from home, you need to figure out places you can go to work. ***Not having access to the internet is not an excuse for incomplete work.***

Drop Policies

You will be dropped from the course if any of the following occur:

- Not responding to the "Introduce Yourself" discussion post by Wednesday January 13th at 11:59 pm.
- Not completing the syllabus quiz by Wednesday January 13th at 11:59 pm.
- Falling two weeks behind in terms of due dates.

If you desire to drop the course, you can do so through Webadvisor. See the important dates section for more information.

College Policies

Accommodations for Students with Disabilities

If you have a verified need for an academic accommodation or materials in alternate media (ie: Braille, large print, electronic text, etc.) per the American With Disabilities Act or Section 504 of the Rehabilitation act please contact me as soon as possible.

Academic Dishonesty

"Students at Reedley College are entitled to the best education that the college can make available to them, and they, their instructors, and their fellow students share the responsibility to ensure that this education is honestly attained. Because cheating, plagiarism, and collusion in dishonest activities erode the integrity of the college, each student is expected to exert an entirely honest effort in all academic endeavors. Academic dishonesty in any form is a very serious offense and will incur serious consequences" (Reedley College Catalog pg 49).

Cheating

"Cheating is the act or attempted act of taking an examination or performing an assigned, evaluated task in a fraudulent or deceptive manner, such as having improper access to answers, in an attempt to gain an unearned academic advantage. Cheating may include, but is not limited to, copying from another's work, supplying one's work to another, giving or receiving copies of examinations without an instructor's permission, using or displaying notes or devices inappropriate to the conditions of the examination, allowing someone other than the officially enrolled student to represent the student, or failing to disclose research results completely" (Reedley College Catalog pg 49).

Student Rights

“Student rights are protected by federal and state laws, and by policies established by the trustees of the State Center Community College District. It is therefore essential for the protection of students’ rights that procedures be established and followed which would identify violations of student conduct standards and the resolutions of such violations. Students have a right to an oral or written notice (reasons for disciplinary action), an opportunity for a review, and a decision given orally or in writing. For more information contact the Vice President of Student Services’ office. (Board Policy 5520, Administrative Regulation 5520)” (Reedley College Catalog pg 49).

Important Dates

- Monday January 11th – first official day of class
- Wednesday January 13th – must complete introduce yourself discussion and syllabus quiz by 11:59 pm.
- Monday January 18th – Martin Luther King, Jr. Day (no office hours, campus is closed)
- Friday January 22nd – Last day to drop the class to receive a full refund
- Sunday January 31st – Last day to drop the class to avoid a “W” (withdrawal)
- Friday February 12th – Lincoln Day observance (no office hours, campus is closed)
- Monday February 15th – Washington Day observance (no office hours, campus is closed)
- Friday March 12th – Last day to drop the course to receive a “W” instead of a letter grade (you are dedicated to a letter grade if still enrolled after this date)
- Monday March 29th – Friday April 2nd – Spring Recess (no office hours, campus closed on Friday)
- Monday May 17th – Friday May 21st – Final Exams Week. **The final exam and any late work are due by Friday May 21st at 11:59 pm.**

*** This syllabus is subject to change at the discretion of the instructor ***
