

Biology 10L (Biol 10L) Introduction to Life Science Lab

<i>Semester: Fall 2022</i> <i>Reedley Community College</i>	
Lecture Instructor: Dr. Christopher Emerling Email: christopher.emerling@reedleycollege.edu	<i>Class No. 50031</i> Lab: W 3:00–5:50 pm, LFS 17
In-person Office Hours: MTWTh 1:00–1:50 pm, LFS 13 Online Office hours: Th 10–10:50 am Zoom ID: 990 6009 7271 Phone: extension 3134 Can request appointments	
<i>Class Dates: 8/8/22–12/9/22</i>	

Catalog Description:

This lab course is recommended for the non-biological science and pre-education majors. This is an introductory laboratory course using biological concepts. The organismal structure, function, inheritance, evolution, and ecology are covered in this course. Field trips may be required. This course is not open to students with credit for Biology 3. (A, CSU-GE, UC, I)

Prerequisites / Corequisites / Advisories:

Prereqs: None. Coreqs: Biology 10 or 10H. Advis: English 1A or 1AH recommended.

Student Learning Outcomes:

Upon completion of this course, students will be able to:

1. Apply the principles of Mendelian genetics to evolutionary theory and human medicine.
2. Assess human impacts on natural systems and critically evaluate solutions to environmental problems.
3. Classify the wide range of living organisms and identify the evolutionary mechanisms that have impacted this diversity.
4. Evaluate current scientific literature and examine how the scientific method is employed in biological research.
5. Explore the cellular basis of life.
6. Recognize the chemical basis of life.
7. Recognize the function of DNA and how its discovery has impacted modern science.
8. Identify levels of biological organization and apply these concepts to living systems.
 - 8a. By examining anatomical and physiological features.
 - 8b. By investigating chemical and energy relationships.

Course Objectives:

In the process of completing this course, students will:

1. apply taxonomic classification in identifying animals through the use of a dichotomous key.
2. calculate genetic probabilities based on the principles of Mendelian genetics
3. compare anatomical and physiological features seen in the animal kingdom with emphasis on human body systems
4. compare and contrast Eukaryote and Prokaryote cell structure.
5. demonstrate knowledge of evolutionary theory and identify the different mechanisms responsible for biological change.
6. describe energy flow and nutrient cycling within an ecosystem. -consider human impact on natural systems
7. diagram plant life cycles and identify major plant adaptations.

8. distinguish the processes of transcription and translation and identify their roles in protein synthesis.
9. explain and compare the processes of photosynthesis and cellular respiration.
10. read scientific literature and apply the steps of the scientific method to laboratory research.
11. recognize chemical elements, bonds and properties of water.
12. relate principles of population ecology to the study of the global human population
13. use the compound light microscope to examine cellular anatomy and reproduction.

TENTATIVE SCHEDULE

Week	Lab
Week 1: 8/8–8/12	Lab 1: How Scientists Think
Week 2: 8/15–8/19	Lab 2: We Are What We Eat – The Chemistry of Life
Week 3: 8/22–8/26	Lab 3: On the Small Side – Microscopy
Week 4: 8/29–9/2	Lab 4: Cell's Kitchen – Cells and Membranes
Week 5: 9/5–9/9	Lab 5: Cells Need Energy – Cell Respiration and Fermentation
Week 6: 9/12–9/16	Lab 6: Living On Sunshine – Photosynthesis
Week 7: 9/19–9/23	Exam 1 (Labs 1–5) , Lab 7: Putting Genes To Work – DNA and How Proteins are Made
Week 8: 9/26–9/30	Lab 8: From One Cell Comes Many – Mitosis and Meiosis
Week 9: 10/3–10/7	Lab 9: The Traits We Have – Genetics and Patterns of Inheritance
Week 10: 10/10–10/14	Lab 10: Sick Of It – Epidemiology and Disease
Week 11: 10/17–10/21	Lab 11: Living Things Change – Mechanisms of Evolution
Week 12: 10/24–10/28	Exam 2 (Labs 6–10) , Lab 12: The Diversity of Life I – A Look at the Microbes
Week 13: 10/31–11/4	Lab 13: The Diversity of Life II – A Look at the Plants
Week 14: 11/7–11/11	Lab 14: The Diversity of Life III – A Look at the Animals
Week 15: 11/14–11/18	Citizen Science Project Day
Week 16: 11/21–11/25	Lab 15: Come Together – Ecology & Biodiversity
Week 17: 11/28–12/2	Lab 16: Our Impact – Humans and the Planet
Week 18: 12/5–12/9	Exam 3 (Labs 11–16)

Required Course Materials

- The lab manual is free and each individual lab handout will be posted online the week the lab will be carried out. Make sure to print out labs prior to coming to class!

Technology Requirements

- The web/online portion of this course will occur through Zoom and Canvas. All students must have access to a device with internet access to that allows students to retrieve and complete assignments through Canvas.

- Check Canvas and your Reedley College email accounts regularly (multiple times per week) for announcements.
- If you need access to technology in order to complete your course, please make sure to contact the [Information Center](#) to check out a laptop or other needed technology.

ATTENDANCE AND DROP/ADD POLICY

Attendance is expected of all students every week in this class. In order to avoid being dropped from this class, you must attend the first day of lecture and/or lab, unless you contact me ahead of time to provide a legitimate excuse for your absence.

Beyond this, I reserve the right to drop students (both enrolled and waitlisted) if the student does not attend the second week and does not respond to contact efforts from the professor during the third week

ASSESSMENTS

Assignment Description	Points
Lab assignments	40%
Lab Practicals	50%
Citizen Science Project	10%

The final course grade is based on a non-traditional scale:

Percent Range	Grade
85-100	A
70-84.99	B
50-69.99	C
30-49.99	D
Less than 30	F

Course grades are non-negotiable. Instructor reserves the right to adjust individual tests and/or assignments should it be to the benefit to the entire class. Final grades may be adjusted to the benefit of the students, should there be a justifiable reason for doing so. I do not round up grades to the next letter grade given that there are multiple opportunities to boost grades during the course.

ASSESSMENTS

Lab Assignments These will contain a number of activities to accomplish during the lab period itself, and include writing up things based on data collected and observations made during the lab. You will submit these in class based on the instructor's direction.

Lab Practicals These may be any combination of multiple-choice, true-false, matching, or short-answer and questions based on the main objectives of each lab and may be based on words only or may include images and/or physical items (e.g., models, specimens). Please note that I require spelling and grammar be as close to accurate as reasonably possible; spelling must be at least phonetically approximate, such that it is unambiguous what your answer is. If I can't clearly understand it, I can't give you points for it.

Citizen assignment This will be a major project for the course and the details are still be finalized. Expect instruction for this later in the course.

LATE ASSIGNMENTS AND EXAM MAKE-UP POLICY

Lab assignments can be turned in at any point during the semester up to the finals week exam (week 18), but will have specific dates suggested for submission. Exams may be difficult to make up, so should only be missed if the student falls victim to extreme, **documentable** circumstances.

EXTRA CREDIT

I do not provide extra credit opportunities in a traditional sense. My belief is that you need to learn and complete what we are doing in class, not something beyond the scope of the normal content. However, I do believe strongly in providing the chance to learn from your mistakes and being able to master content on subsequent attempts. I will inform you of potentially opportunities to demonstrate your knowledge at later points in the class.

COMMUNICATION POLICY

The best way to get ahold of me it to send me a direct message through Canvas. The second best way is to email me at christopher.emerling@reedleycollege.edu. Don't know how to send a message in canvas? Check out this quick guide [How to send a message in canvas](#).

- Please allow a 24hr response time on business days (Mon-Fri). I tend to be very prompt with my email responses, however, there are times when it may take me up to 24hrs to respond. As a rule, I try to prioritize messages and e-mails that require an immediate response over those that are less urgent, so please indicate if the message is urgent. If you do not receive a response from me after 24hrs then please double check that you have contacted me correctly (e.g., was it the correct email address?), and then try both Canvas messages and e-mail.
- Emailing and messaging can be used 24/7. If I expect to be away from my computer for any significant length of time, you will be notified in advance.

OFFICE HOURS

Office hours are a great chance to meet one-on-one with your instructor, so you can get extra clarification on concepts that you have found difficult, practical advice on studying, additional context for completing assignments, and otherwise general support in the course. You can stop by my office directly during these hours, but if you cannot make it in person, I can jump onto Zoom and chat with you. My office hours office number, the Zoom ID and are posted on the first page of this syllabus. Office hours likely will not be posted in the first week but will be posted as soon as I have all the information I need to schedule them.

CANVAS

All lab handouts will be located on Canvas, which you can access here: <https://scccd.instructure.com/login/ldap>. Please turn on e-mail notifications for Announcements in Canvas or check them regularly. You can find them under the tab "Announcements" and see the three most recent announcements at the top of the course page.

STARFISH

I will be using a service called "Starfish" throughout the semester as a way to provide you with progress reports. Of course, you are able to view your grade any time on Canvas, but this gives me a way to acknowledge your success or encourage you if you're struggling during the class. If you're having a particularly difficult time, enough Starfish alerts from your instructors can trigger your counselor to contact you and help you to figure out the best plan of action for the course (i.e., whether to drop, get tutoring, change majors, etc.). Check your emails periodically in case you receive any Starfish alerts or "kudos" from myself or other instructors.

DROPPING THE COURSE

It is the student's responsibility to drop themselves from the course, not the professor. Here are some important dates, derived from the [Reedley College Academic Calendar](#):

August 19th: last day to drop for full refund

August 26th: last day to drop to avoid a "W"; last day to Add in person

October 7th: last day to drop (letter grades assigned after this date)

TUTORING

We may have a tutor embedded in our course this semester. The tutors are former, successful students who understand the material well, know how to study for the class and can help you succeed. I highly recommend most students to receive tutoring, even students who tend to do reasonably well. Students that are getting tutored are not 'less than' others who don't go to tutors. I received tutoring when I was in college (calculus and physics), and this tutoring helped me enormously to succeed in those classes.

COLLEGE POLICIES

The university has several policies that you will be expected to adhere to in my course. The policies on **Disabled Students Programs and Services, Student Conduct Standards, Academic Dishonesty**, and the **Computer/Network Equipment Use Policy**, portions of which are below, can all be found in the Reedley College Catalog.

Academic Dishonesty: "Students at Reedley College are entitled to the best education that the college can make available to them, and they, their instructors, and their fellow students share the responsibility to ensure that this education is honestly attained. Because cheating, plagiarism, and collusion in dishonest activities erode the integrity of the college, each student is expected to exert an entirely honest effort in all academic endeavors. Academic dishonesty in any form is a very serious offense and will incur serious consequences." Reedley College Catalog. In an online classroom, academic dishonesty can manifest as copying other students' work, sharing answers on exams and much more. When you cheat, not only do you defraud the college, but you devalue your education and the education of others by weakening the integrity of our institution. Furthermore, in my experience, cheaters almost never succeed at their career goals, so don't ruin your opportunity to learn!

Please see the Student Conduct Standards and Grievance Procedures Handbook available in the Vice-President of Student Services office, or at the links listed below.

Student Conduct Standards: <https://www.reedleycollege.edu/about/about-us/policies-and-procedures/student%20conduct%20standards.html>

Grievance Procedures: <https://www.reedleycollege.edu/about/about-us/policies-and-procedures/grievance-procedures.html>

Academic Accommodations: If you have a verified need for an academic accommodation or materials in alternate media (e.g. Braille, large print, electronic text, etc.) per the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act, please contact the instructor as soon as possible.

DIVERSITY STATEMENT

Diversity is not only a fact of life but, to me, it is one of life's most beautiful traits and greatest strengths. My goal is for all students from all backgrounds and perspectives to be able to succeed, thrive and feel valued in my courses. My valuing of diversity encompasses gender, sexual identity, disability and health status, age, socioeconomic status, religion, philosophy, ethnicity, race, and culture. If you believe that my course and/or my instructional techniques are in any way invalidating your group identity or are in some way hampering your ability to succeed, please let me know so that I can address any concerns you have.

FINAL NOTES

Every syllabus represents the intended roadmap and structure of the course, but due to unforeseen events and/or feedback during the semester, adjustments may be necessary. This is a reminder that some details described in this syllabus or potentially subject to change at the discretion of the instructor, but he will inform you as promptly and clearly as possible as to the reasoning for any changes.

Student Learning Outcomes are statements about what the discipline faculty hope you will be able to do at the end of the course. This is NOT a guarantee: the ultimate responsibility for whether you will be able to do these things lies with you, the student. In addition, the assessment of Student Learning Outcomes is done by the department in order to evaluate the program as a whole, and not to evaluate individual faculty performance.
