

MATH 3A WEB, COLLEGE ALGEBRA, Section #52039

Welcome! Looking forward to having you in class 😊

Instructor: Mrs. Lina Obeid	Class Room: Web	Student Access to Class Materials: 24/7 prior to deadlines.
Office Hours: M 10 to 11am (email or zoom); T 1 to 2pm (office or email); W 9:30 to 10:30am (office or email); TH 1 to 2pm (office or email); F 9am to 10am (email or zoom)		
Advisories: Check with your counselor.		Prerequisites: Check with your counselor.

What is required?

To succeed, it is important to know what is required.

- 1) Class assignments are on [pearsonmylabandmastering.com](https://www.pearsonmylabandmastering.com) (also referred to as MyLab or MYMATHLAB). Mylab should be accessed from Canvas only.
 - To access Canvas, go to 'MYPORTAL' on the Reedley College Website, and sign in to Canvas.
 - To access MyLab, click on MY LAB AND MASTERING in Canvas and register for Mylab. Announcements, resources, syllabus, documents that help you get started are posted on CANVAS under Module 0. For help, click on Module 0 in Canvas. It contains instructions and resources you need to proceed.
- 2) **REQUIRED:** This course requires students to purchase Pearsonmylab access code (includes e-book but not a hard copy of the book – Hard copy of the book is optional/not needed). This access code may be purchased at the bookstore or online at [pearsonmylabandmastering.com](https://www.pearsonmylabandmastering.com). **DO NOT PURCHASE it BEFORE CLASS BEGINS!** Read and follow the detailed instructions given in this syllabus and in Module 0 on CANVAS. **The price is around \$95, but might vary.**
 - Go through Canvas, click on MY LAB AND MASTERING to start working immediately before paying. You will then have about 10 days to pay for your materials.
- 3) **TECHNOLOGY:** *This class requires you to have a computer/laptop/connected device.* This class requires students to access pearsonmylab in a timely manner, so a computer with a high-speed connection is needed. Your browser (i.e. Chrome, firefox, etc.) must have specific plug-ins and updates. Google Chrome seems to be the best browser to use with PearsonMylab. Clearing your cookies and allow pop-ups avoids issues as well. *Students need to make sure they have access to the proper technology before proceeding in this class.*
- 4) **MATERIALS:** Students need a good quality notebook, 1 yellow highlighter, ruler, pencils, and a good eraser. A TI84/83 graphing calculator is helpful but NOT NEEDED. It is best to use DESMOS (free online) instead. In addition to DESMOS, you can use any free online calculator/ app or Geogebra.

- 5) **AMOUNT OF WORK:** This is an 18-week 4-unit course. Such classes require 4 hours of “classwork/lecture” and 8 hours of “homework/practice” on average a week. An online class affords students a bit more flexibility than a face to face class. However, it still requires time, good study skills and independent work.
- 6) **COMMUNICATION:** This class requires that all communication be through **school** email (SCCCD):
 - 1) email me through CANVAS;
 - 2) email language must be professional and written in full sentences;
 - 3) type your first and last name at the end of every email;
 - 4) avoid private details (TMIs);
 - 5) Include the appropriate topic in the subject bar
 - 6) Check the email address you have provided Mymathlab. Make sure to always use a school email and not a personal email address for any communication.

Attendance and Tardy Policy:

Please make your education a priority. To succeed and to help us help you, please study on daily basis. Attendance is based on work done. Students who do not respond to emails, follow directions, and/or work regularly might be dropped. **Don't leave it to the last hours before the deadline to start working. Procrastination will frustrate you and will be a hinderance to your success.**

Here is what you should do by and on Monday, January 8:

- Get a reliable computer and decent online access.
- Follow instructions and read information emailed to you or posted on Canvas.
- Check CANVAS for announcements posted and check your SCCCD email Read them carefully. [To access Canvas go to 'MYPORTAL' on the Reedley College Website, then click on CANVAS link.]
- Click on Module 0 in Canvas to read or view the information carefully to know how to proceed in this course and what to expect. Module 0 will contain important documents, information, the syllabus, MyLab registration instructions, as well as videos to help you proceed.
- In Canvas, click on *MyLab and Mastering* tab to see how to proceed. For additional help registering for MyLab and for help to access the assignments, watch the Pearson Student Registration videos posted in Module 0 on Canvas. Sign up for MyLab and access course assignments on MyLab.
- MyLab is the platform and software we will use in this class to complete homework, quizzes, and exams. MyLab is a very powerful system that comes with amazing resources such as GET HELP, VIEW AN EXAMPLE, TECH VIDEOS, EBOOK and even more resources!
- You can start working on MyLab immediately and pay a few days later. You will have a grace period of a week to pay for it. You can access Mylab through Canvas (also referred to as MyLab or Mymathlab or MyLab and Mastering).
- Start working on assignments on *MyLab and Mastering* tab through Canvas. Assignments are due on regular basis. Students who fail to follow directions, sign up/access Mylab, or complete assignments might be dropped. Work on assignments early to avoid missing deadlines or getting late grades. Feel free to email me if you need help.

Here is what you should do after Monday, January 8:

- Work on your assignments DAILY as there are multiple assignments due daily. To succeed follow your instructor's due dates.
- Watch videos, before you do homework. Do homework and quizzes, then do Exams.
- Check Canvas and MyLab and read emails/announcements daily to avoid procrastinating and to avoid accumulation of work.
- Mark all assignment deadlines in your personal calendar.
- Use CANVAS for all communication in this class.
- Pay for MYMATHLAB ASAP to avoid being shut out of MyLab.
- MyLab offers students a temporary free access code which allows students to sign up and work for a few days without paying. The deadline for that grace period will be posted on the MyLab login page and can be viewed every time a student logs in. The publisher will deny access to students who do not pay by the grace period's deadline. *Students must buy the access code ASAP to avoid missing deadlines.* It is the student's responsibility to pay in a timely manner to avoid being denied access to their assignments or test.
- Since this is an **online** class, students are expected to check their e-mails and announcements daily and work on MyLab/Canvas daily. Late work might affect your grades negatively. Students who do not work on regular basis could be dropped for non-attendance. The attendance policies still hold in an online class. Missing assignments, not checking or responding to emails, is equivalent to being absent.
- Students are responsible for all information sent to them in emails or posted on Canvas.
- The response time in this class is very good, but students should not expect an instant response especially on holidays, weeknights or weekends. Students are given access to the course 24/7 in order to work any day/any time.
- Sign up to work with our embedded tutor if you need assistance

Behavioral, Campus, and Academic Policy:

Reedley College campus policies and academic regulations are implemented in this class.

- Students are responsible to stay informed and follow instructions provided by the district on COVID-19: <https://www.reedleycollege.edu/covid-19/index.html>
- Students must act and communicate professionally in class and online.
- Files, documents, recordings, videos, and materials modules provided for the class are only for students enrolled in this class to use during/for this class only. Unauthorized transfer or sharing of class materials is prohibited. **Unless a teacher has explicitly stated otherwise, communications in the class are intended for the students in the class only and not for the general public. A person who records in a classroom setting without permission runs the risk of violating the teacher's federal copyright rights.**
- **Plagiarism:** Reedley College rules on plagiarism are enforced. **In addition, the student receiving the grade on their transcript needs to be the person doing the work to earn the grade at ALL times in this class.** Otherwise, the student will receive a 0% or F in the course, and/ or suffer the consequences of plagiarism as set forth by the college's academic regulations. In other words, **the student doing the online assignments or taking the online exams/quizzes/homework needs to be the student enrolled and getting the grade in the course. If not, the student will receive an automatic F in the course.**

Grading Policy:

If math is a difficult subject for you and/or you have failed Math before, please put in the time and effort to succeed.

Grades are posted and updated on MyLab/Canvas. Students are graded according to the following:

Online homework grades constitute **65%** of the student's overall grade.

Online exams and Final exam grades constitute **35%** of the student's overall grade.

Online Homework: 65% of the student's overall grade

Your success is very important, so please spend the time and effort needed to do well on your homework.

- Homework is assigned on MyLab/Canvas. It is to be completed online on MyLab/Canvas or [pearsonmylabandmastering through Canvas](#).
- Students have several tries on each question to get the question right.
- Students have return privileges for all homework assignments- meaning that students do not have to complete a homework assignment in one sitting.
- Assignments have due dates to help students avoid procrastination. Homework questions can be submitted Late. Do homework in a timely manner to prepare for the quizzes and exams, to avoid procrastination, and to pass the class.
- This category also includes of student's involvement in Canvas discussions/assignments or overall class participation. Some assignments are designed for online participation and require group discussions.
- Whenever possible watch the lecture videos and take notes before starting the homework. Do not expect to take the test and then complete the homework.
- In order to keep good long-lasting habits, you should solve each problem and show step-by-step work in a **notebook** designated for this class. Write neatly detailed work for each question (scratch type work is not acceptable and is not helpful). Detailed work will help you study for the exams and perform better in the class. This notebook will not be collected, but you will be able to use it on quizzes and exams 🙏
- **FIRST WEEK ASSIGNMENTS MUST BE DONE BY THE FIRST WEEK. Anyone who has not completed the first week's work will be dropped by the end of the first week.**
- **All homework assignments will PERMANENTLY SHUT DOWN Tuesday, May 7.**

Online Chapter Exams and One Final Exam: 35% of the student's overall grade

Please review and study as much as needed to earn a better grade on these exams. Also, do the practice quizzes and study to earn a better grade on the online tests. *Students who do not do well on the quizzes and on the homework will have a hard time passing the exams and passing the class.*

- **Students must complete the homework and practice quizzes before taking a chapter exam. Do not procrastinate to avoid missing assignments.**
- **There will be about 6 exams in total: 5chapter-exams and 1 final exam. The chapter exams will open a couple days before they are due. Students must take the exam by the due date. All exams have the same weight.**

- Online exams are **timed**, so pace/time yourself. You are given 90 minutes for chapter exams and 2 hours for the final exam. This is plenty of time for the number of questions given.
- In addition, while taking an online exam, students are not allowed to get help from anyone (directly or indirectly), nor to navigate away from the exam. You are allowed to use notes, excel, calculators, and graphing utilities. **Incomplete exam will be graded as is.**
- **Students have up to three* tries on each exam.** This is to allow for a practice and/or for any emergency or technical issues. The highest grade of all attempts will be given. Students need to make sure they have a good connection and do not close their browser or navigate away once they begin an online exam. It is the student's responsibility to take the exams early enough to take advantage of the multiple tries.
- **Online exams must be completed in one sitting.** Once you start it, the clock starts.
- Chapter exams are to be taken by the scheduled date/time. (If you have a documented illness, email me as soon as possible for an academic plan). **The exams will be available on Mymathlab a few days before the deadline.** Work daily on Mymathlab to avoid missing deadlines.
- **FIRST WEEK ASSIGNMENTS MUST BE DONE BY THE FIRST WEEK. Anyone who has not completed the first week's work will be dropped by the end of the first week.**
- **All chapter exams will PERMANENTLY SHUT DOWN Tuesday, May 7.**
- **The final exam** is a comprehensive final. The final exam is to be taken online (on MyLab) by **Wednesday, May 15.** Student get 2 attempts on final exam. Make sure you mark your calendar. The final exam will be available a few days before it is due **and will PERMANENTLY SHUT DOWN Wednesday, May 15.** *Students who do not take the final will receive a score of 0% on the final.*

Grading Scale:

A	=	90% - 100%	B	=	80% - 89%	C	=	70% - 79%
D	=	60% - 69%	F	=	Below 60%			

Tips for success:

- Watch the videos, take notes, and do examples before starting the homework.
- Put in the maximum effort daily in every aspect of your work.
- Maintain an organized and detailed notebook for homework and notes.
- Do not expect a good grade for average, mediocre, or poor work.
- Do not procrastinate.
- Avoid making excuses.

Accommodations for students with disabilities:

- If you have a verified need for an academic accommodation or materials in alternate media (i.e., Braille, large print, electronic test, etc.) per the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act, please contact the teacher as soon as possible.☒
- It is the student's responsibility to schedule their appointments with the DSPS office as soon as soon as they are announced in class. **Any special arrangements need to be done in advance and in writing.**

HOMEWORK AND EXAM DATES, TIME, AND LOCATION:

It is the student's responsibility to put in the time and effort necessary to pass this class. It is the student's responsibility to follow the due dates and deadlines set forth for this class and to avoid missing or failing assignments.

WEEK	DATE	ASSIGNMENTS	LOCATION
1	Monday, January 8, 2024	<i>Semester begins</i>	
	Tuesday, January 9, 2024	HW: 0 & Lecture 1-1	MYLAB

	Tuesday, May 14, 2024	Review for final exam - use study guide	
	Wednesday, May 15, 2024	FINAL EXAM IS DUE- covers chapters 2, 3, 4, 7, 8.	MYLAB

SOME IMPORTANT DATES FOR SPRING 2024

It is the student's responsibility to ask *the Admissions and Records office* or check course schedule for any other dates that pertain to financial aid or drop deadlines of any kind.

DATE	DAY	EVENT / DEADLINE
January 8	(M)	Start of Spring 2024 semester
January 15	(M)	Martin Luther King, Jr. Day observed (no classes held, campus closed)
January 19	(F)	Last day to drop a Spring 2024 full-term class for full refund
January 26	(F)	Last day to register for a Spring 2024 full-term class in person with add authorization
January 26	(F)	Last day to drop a Spring 2024 full-term class to avoid a "W" in person
January 28	(Su)	Last day to drop a Spring 2024 full-term class to avoid a "W" on Self-Service
January 28	(Su)	Last day to add a Spring 2024 full-term class with add authorization on Self-Service
February 16	(F)	Lincoln Day observance (no classes held, campus closed)
February 19	(M)	Washington Day observance (no classes held, campus closed)
March 8	(F)	Last Day to drop a Spring 2024 full-term class (letter grades assigned after this date)
March 25 - March 29	(M- F)	Spring recess (no classes held, campus open Mar 25-28)
MAY 7	(T)	Last day to submit any past due assignments
MAY 15	(W)	Final exam due – LAST DAY TO SUBMIT THE FINAL EXAM

Course Description:

This is a college level course in algebra for majors in science, technology, engineering, and mathematics. Students will study polynomial, rational, radical, exponential, absolute value, and logarithmic functions. Topics include systems of equations, theory of polynomial equations, and analytic geometry.

Course objectives:

1. Analyze and investigate properties of functions, including linear, polynomial, absolute value, rational, radical, exponential, and logarithmic functions
2. Synthesize results from the graphs and/or equations of functions, including linear, polynomial, rational, radical, exponential, and logarithmic functions
3. Apply transformations to the graphs of functions
4. Recognize the relationship between functions and their inverses graphically and algebraically
5. Solve and apply rational, linear, polynomial, radical, absolute value, exponential, and logarithmic equations and solve linear, nonlinear, and absolute value inequalities
6. Solve systems of equations and inequalities
7. Apply techniques for finding zeros of polynomials and roots of equations
8. Apply functions and other algebraic techniques to model real world applications
9. Analyze conics algebraically and graphically
10. Use formulas to find sums of finite and infinite series

NOTE: It is the student's responsibility to put forward the time, effort, and ability needed to master these course objectives upon completion of this course. The lower the student's math ability, the higher will be the student's effort and time needed to master the objectives.

➤ *Instructor reserves the right to make minor changes to the syllabus.*
