

DRAFT (8/26/12)

District Technology Committee

It is the charge of the District Technology Committee to monitor and update the District Technology Plan to assure that all technology supports the needs of learning, teaching, college-wide communications, research and operational systems. Furthermore, the committee is responsible for assuring that technology planning is integrated with institutional planning. The committee is responsible for systematically assessing the effective use of technology resources and uses the results of evaluation as the basis for improvement. The committee is charged with assuring that the District Technology plan remains a flexible output based technology plan. This plan should be based on the specifics of what students, staff, faculty and administration want to be able to do with technology rather than input measures such as number of machines we need. The District Technology Committee will insure that the District Technology Plan meets the following accreditation standards:

1. Technology services, professional support, facilities, hardware and software are designed to enhance the operation and effectiveness of the institution.
2. The institution provides quality training in the effective application of its information technology to students and personnel
3. The institution systematically plans, acquires, maintains, and upgrades or replaces technology infrastructure and equipment to meet institutional needs
4. The distribution and utilization of technology resources support the development, maintenance, and enhancement of its programs and services.

District Technology Committee Membership to be determined by the District Technology Taskforce
