David Balogh – FCC faculty representative

Deborah Ikeda – WI Campus President

Ed Eng – VC, Finance and Administration

Districtwide Technology Task Force Charge

Charge

It is the charge of this Districtwide Technology Task Force to develop and recommend a work plan for development of a comprehensive technology master plan for the district; and to recommend the composition and an operating agreement for establishing a standing Districtwide Technology Master Plan Committee.

While the initial work should take into consideration the recommendations made by the College Brain Trust and CampusWorks regarding the districtwide technology issues, the long-range goal is to establish a flexible output based technology plan. This plan should be guided by the governing board's vision for the future.

Tasks to be completed will include:

1. Review the report from the College Brain Trust and CampusWorks regarding districtwide technology issues.
2. Review and identify the objectives met and unmet in the 2000 District Technology Strategic Plan.
3. A work plan with timelines for development of a Districtwide Technology MasterPlan that aligns with the 2012-2016 Districtwide Strategic Plan, the colleges'/centers technology plans and the governing board's future vision for technology.
4. Establish timelines and objectives to be completed by the taskforce prior to transitioning to a standing Districtwide Technology Committee.
5. Ensure the task force's recommendations meet the accreditation standards.
6. Transition to a standing Districtwide Technology Committee after the taskforce completes its objectives.
7. Recommend an operating agreement to establish a standing Districtwide Technology Master Plan Committee.

Proposed Membership of Technology Task Force
